RE: Right-of-Way Assessment Walking Survey

Dear Landowner,

Marathon Pipe Line LLC (MPL) operates the pipeline system that crosses your property. The purpose of this letter is to inform you of upcoming activity on the right of way. MPL will be conducting a Right-of-Way Assessment Walking Survey (RAS), as part of the continued monitoring and maintenance of this pipeline.

MPL, along with its contractor Survey and Mapping, LLC, will be conducting a RAS to collect the depth of the pipeline. This will be performed by probing and/or utilizing electronic devices, which will then be evaluated to ensure the buried pipeline depth is appropriate for the land use. The crew will also gather Global Position System (GPS) data for any structures found to be within 25 feet of the pipeline.

The RAS will not require any digging and will not otherwise result in any damage to your property. Two to three individuals will be walking the entire pipeline right of way. Due to the terrain of the right of way, the survey crew may need to use a Utility Terrain Vehicle (UTV) to access certain areas of the right of way. We do not anticipate any land damages from the UTV, however, if land damage is present, please contact MPL at the phone number listed above or email landowners@marathonpetroleum.com.

For the safety of our crew, it may be necessary for them to park their vehicles off the roadway on the right of way to avoid any vehicular traffic. MPL plans on beginning the RAS the week of _____, and completing the survey by _____. This timetable is subject to delay depending on the weather and any other unexpected outside influences. Please contact any tenants or lessees who may rent the land to advise them that MPL will be conducting this survey.

MPL takes great pride in the relationships we have built on trust with our many landowners and communities in which we live and work. It is our goal to maintain good relations with all of our neighbors, working with them in a fair and responsive manner. Please email MPL at landowners@marathonpetroleum.com or call 1-855-888-8056 if you have any questions or concerns. If you have received this communication by mistake or your address has changed, please let know so that we can update our records accordingly.

Sincerely,

Aron D. Velasquez
Right-of-Way Supervisor
