RE: Right-of-Way Clearing & Canopy Trimming Maintenance

Dear Landowner,

Marathon Pipe Line LLC (MPL) operates a pipeline that traverses through your property. The purpose of this letter is to notify you that MPL will soon perform routine right-of-way maintenance activities on your property. As part of maintaining the pipeline and its easement, MPL carries out a program to clear vegetation and obstructions on each side of the pipeline within a specified distance, as defined in the easement agreement. This ensures safe access, operational reliability, and compliance with regulatory requirements.

Making a difference—together. A variety of factors have helped us determine the best approach to take on your property. We have recently conducted vegetation assessments to set goals specific to location, land use, habitat, plant species, and other criteria. For this work, the aerial vegetation assessment revealed that there is/are tree(s) obstructing the patrol of the pipeline for ground conditions to be seen. Qualified workers may be clearing trees from the pipeline right of way and/or pruning trees along the edge of the corridor to direct growth away from obstructing the visibility of the pipeline.

Accessing the pipeline. If necessary, MPL will, at its sole cost, temporarily remove any fence obstructing its access to the right of way and promptly reinstall the fence after completion. In maintained or landscaped areas, tree debris is chipped and removed to the extent possible, and the tree branches are cut into manageable sizes and stacked in place. In unmaintained areas, any trees that are removed will be dropped into wooded areas or felled parallel with the edge of the right of way.

Let's stay connected! MPL values the relationships with our landowners like you and the communities in which we live and work. An MPL representative will be in contact with you to discuss the upcoming activities and specific timing. As always, we invite you to contact us with any questions or concerns via the phone number or email address listed above. To better assist you, please reference the pipeline system information below along with the GPS (lat,long) coordinates. This will ensure the proper MPL representative can be notified to contact you.

If you have received this communication by mistake or your address has changed, please let us know so we can update our records accordingly.

Sincerely,

Aron D. Velasquez
Right-of-Way and Public Engagement Manager
