RE: Right-of-Way Vegetation Maintenance

Dear Landowner,

Marathon Pipe Line LLC (MPL) operates a pipeline that traverses through your property. The purpose of this letter is to notify you that MPL will be performing routine right-of-way maintenance activities on your property soon. In addition, we'd like to share some exciting updates which will be taking effect.

Nature-based solutions. MPL is committed to developing new ways to promote long-term environmental health across its operating footprint. With that, we are implementing an industry-leading sustainable landscapes management strategy along our pipeline rights of way, harnessing nature-based solutions to enhance habitat for pollinators and wildlife. MPL has partnered with natural resource experts from Pheasants Forever and Quail Forever Inc. to incorporate this habitat management approach into our ongoing pipeline maintenance program and measure our success.

Making a difference—together. A variety of factors have helped us determine the best approach to take on your property. We have recently conducted vegetation assessments to set goals specific to location, land use, habitat, plant species, and other criteria. MPL will be using an integrated vegetation management approach, including (but not limited to) the use of select herbicides. This science-based approach is considered an industry best management practice. We do not intend to disturb any sensitive areas that are currently maintained by you such as crops, food plots, gardens, orchards, or tree farms, but please contact us if they exist on the right of way.

Accessing the pipeline. If necessary, MPL will, at its sole cost, temporarily remove any fence obstructing its access to the right of way and promptly reinstall the fence after completion.

Let's stay connected! MPL values the relationships with our landowners like you and the communities in which we live and work. As always, we invite you to contact us with any questions or concerns via the phone number or email address above. To better assist you, please reference the pipeline system information below along with the GPS (lat,long) coordinates. This will ensure the proper MPL representative can be notified to contact you.

If you have received this communication by mistake or your address has changed, please let us know so we can update our records accordingly.

Sincerely,

Aron D. Velasquez
Right-of-Way and Public Engagement Manager
